

MIDLAND AU50 Xtreme

The **AU50 Xtreme** auxiliary speaker from Midland is the **perfect** addition to any CB radio set-up.

The **sturdy** housing withstands the demands of various environments. Whether you're in rough terrain or on the road, this speaker remains **reliable** and **powerful**. Additionally, the device is protected against water and dust according to the **IP67 standard**.

The vertically **adjustable** mount allows for **flexible** positioning of the speaker according to your needs. The Midland auxiliary speaker boasts a **maximum** power output of 20W, **significantly** enhancing the clarity of your communication, even in noisy environments. An impedance of 8 ohms ensures efficient energy utilization and **optimizes** sound quality.
