Starting into the digital radio world has never been so easy!

Albrecht Audio has developed a new digital radio that is so simple and easy to use that it is suitable for everyone.

The radio can be used in 2 different operating modes. In the „Senior mode“ only the functions switch on / off, volume control and favorite stations are available. No settings can be inadvertently changed and incorrect operation is therefore completely prevented.

The „Standard mode“ has various additional functions such as e.g. station search, station list, settings, etc. to easily set up the radio.
