ENERPUMP

Portable air compressor with power bank to inflate motorcycle, car and bicycle tyres.

ENERPUMP

The portable air compressor is the ideal companion for those who are always on the move. Thanks to its compact design, it can be easily carried in a small bag or under the saddle. Equipped with a 4000 mAh battery, it also works as a power bank, allowing you to charge electronic devices such as smartphones and tablets. With pressure up to 150 PSI, this compressor quickly inflates motorcycle, car and bicycle tires in less than a minute, perfect for roadside emergencies.

KEY POINTS

- Emergency kit
- Can be used to inflate car, motorbike and bicycle tires as well as balls.
- Compact
- Power bank
- Built-in LED light

ENERPUMP

TECHNICAL FEATURES

- Default pressure range 0.2 - 10.3 bar 3 - 150 psi
- Battery capacity 4000 mAh
- Operating temperature
Charge: 0° +45° Discharge: -10° +45°
- Storage temperature -10 °C +45 °C
- Input voltage and current 5V --- 2A
- Tube length 180 mm (including needle adapter and without thread)
- Noise emitted < 80 dBm 1 meter
- USB Type C charging port
- Charging time < 3 hours
- Schrader valve size: 11x20 mm Presta: 11 x 15 mm
- Sensor accuracy ± 2 psi
- Dimensions 122x70x45 mm
- Weight: 427 g

CODE: C1651

COMPLIANCE

Device compliant with European regulations

The ENERPUMP portable air compressor is a versatile and practical device, designed to make life easier for anyone who needs to inflate tires or charge electronic devices while travelling. Here are the main features that make it an indispensable accessory.

Portability

The compact design of the air compressor allows you to easily carry it wherever you go.

Fast Inflation Speed

With a maximum pressure of 150 PSI, the compressor can inflate motorcycle, car and bicycle tires in less than a minute. This inflation speed is especially useful in road emergency situations or when you need to quickly prepare for a trip.

Built-in Power Bank

The compressor is equipped with a built-in 4000 mAh battery which also acts as a power bank. This allows you to charge electronic devices such as smartphones, tablets or other USB gadgets, offering a double advantage: tire inflation and charging of electronic devices in a single product.

LCD Digital Display

The compressor is equipped with an LCD digital display that shows the tire pressure in real-time. This allows for precise control during the inflation process, avoiding the risk of overinflating or underinflating the tires. The pressure can be set from the display using the selection buttons. Once the desired pressure is reached, the system automatically shuts off. The display also stores the standard pressure values based on the type of use.

Duration

When fully charged, the compressor can remain in standby for 6 months without being used.

LED torch

For night use, the compressor is equipped with a LED torch. This feature is extremely useful for emergency situations in low light conditions, such as during the night or in dark areas.

Material

Made of extremely durable aluminium alloy.

In summary, the portable air compressor is a multifunctional and reliable accessory, perfect for those looking for a compact, powerful and versatile device to deal with daily needs and road emergencies.

Air compressor

ENERPUMP

The packet contains:

1. Enerpump air compressor
2. Presta valve adapter
3. Needle
4. Charging cable
5. 2 inflation adapters.
6. Extension
