ALBRECHT

AE 6290 VOX

The first Albrecht CB radio with integrated repeater/relay function.
With the new repeater function of the AE 6290, you can achieve almost twice the range compared to normal CB radio operation.
In repeater mode, transmission takes place on one channel and reception on a second channel. The radio automatically switches back and forth between the two channels. This enables communication with weaker, more distant radio stations that are located within the range of a relay. This significantly increases the radio range.

KEY FEATURES

VOX hands-free function
Enables hands-free operation for safe and comfortable driving

Relay amplifier function
Amplifies signals via relay stations for extended range in networks

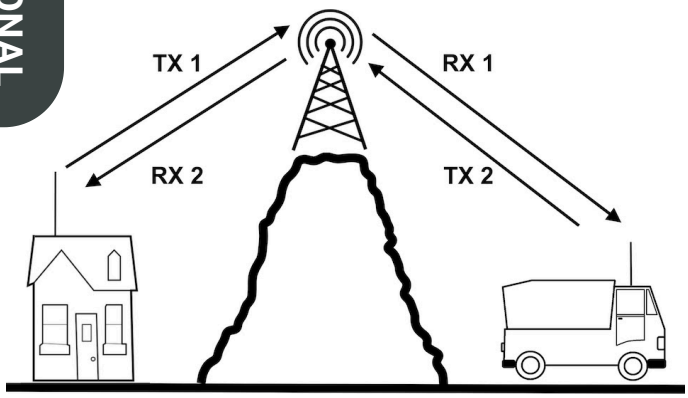

Automatic noise filter (ASQ)
Automatic suppression for clear reception without manual adjustment

CTCSS/DCS tone filter
Filters only suitable signals in busy channels for interference-free reception
