AE 6491 ANC CB Radio

For the latest version of the **AE 6491** CB radio, Albrecht has developed and integrated a technical innovation: the **ANC and NRC noise filters.** The **NRC** filters hiss and other interference out of incoming transmissions. This makes speech easier to understand. The **ANC** reduces background noise that the microphone picks up while you transmit. This reduces wind and engine noise in your transmissions, for example. Combined, the two noise filters deliver audio quality never before heard in CB radio! In addition, the new **VOX hands-free function** allows you to communicate in the vehicle without having to pick up the microphone. As a result, the CB radio can be used in vehicles with complete peace of mind in accordance with the latest German Road Traffic Regulations, § 23 (1a) StVO.
