

ALBRECHT

DR 57 Car Radio Adapter

Don't want to miss out on clear digital radio in your car? The Albrecht DR 57 lets you add DAB+ with ease – without replacing your existing car radio. The signal reaches your car radio wirelessly via the FM transmitter or by cable via Aux/Line-Out. The active DAB+ film antenna and a reception stabiliser ensure optimum reception, even at high speeds. The DR 57 also works as a hands-free kit for your smartphone: take calls via the built-in microphone and stream your favourite music. The 2.4" TFT display can be dimmed and the Service Following function automatically searches for alternative frequencies. On top of that, you get 30 favourite presets, a USB charging port for external devices and traffic announcement detection. The suction-cup mount with ball joint allows flexible installation.

KEY FEATURES

Easy installation

Wireless transmission to your car radio via the FM transmitter – or by cable via Aux/Line-Out.

Hands-free & music streaming

Make calls hands-free and stream music directly from your smartphone.

Automatic station tracking

Service Follow automatically searches for alternative frequencies – so your station stays with you on the road.

5 station buttons

Call up your favourite stations directly on the front – plus 30 favourite presets.
