

Tour Guide System

> ATR/ATT 400

The ATR/ATT 400 Tourist Guide devices are the perfect solution for communicating with large groups during city trips, shore excursions on cruises, bus tours, and many more.

ATR/ATT 400 transmitters and receivers can also be used in museums and on factory tours for sharing information between a guide and many participants.

The handy devices in mini format ensure crystal-clear reception thanks to 2.4 GHz ISM band technology that can be used throughout Europe.

The ATR/ATT 400 communication system can be flexibly combined with a transmitter and any number of receivers.
