

MIDLAND

Bike Guardian Pro

The Midland Bike Guardian PRO represents the latest evolution in modern motorcycle cameras, combining excellent image quality with maximum safety. Equipped with a high-resolution Sony sensor and a state-of-the-art processor, the device delivers razor-sharp footage in brilliant 2K resolution. The rugged housing made of high-quality aluminum reliably protects the technology from impacts and all weather conditions. Thanks to built-in Wi-Fi connectivity, the camera can be controlled directly via smartphone and enables convenient live streaming via the app. An innovative image stabilizer minimizes disruptive vibrations while riding. Fine-tuning the microphone sensitivity effectively reduces annoying wind noise—for crystal-clear sound and captivating videos on every ride.

KEY FEATURES

Brilliant 2K video quality

Thanks to its Sony sensor and fast processor, it delivers crystal-clear videos in 2K resolution.

Wireless Wi-Fi & Streaming

Enables convenient remote control, live streaming, and data transfer directly through the VSYSTO app.

Versatile mounting options

They allow for flexible and secure mounting on motorcycle handlebars or directly on a helmet, featuring an extremely compact, weatherproof, all-aluminum housing.

Dual Mode

Offers flexible use as either a motorcycle dashcam or a portable action cam.

MIDLAND Bike Guardian Pro

FEATURES

- Built-in image stabilizer for effective compensation of vehicle vibrations
- Adjustable microphone sensitivity to minimize distracting wind noise
- Rugged, shock-resistant all-aluminum housing with IP65 water resistance certification
- Integrated Wi-Fi module for wireless connection to mobile devices
- Convenient live streaming and remote control via the VSYSTO app
- Powerful, latest-generation dual-core 600 MHz processor Dual-mode operation: can be used either as a permanent dashcam or a mobile action cam
- Automatic overwrite protection and reliable continuous recording

TECHNICAL SPECIFICATIONS

- **Video resolution:** 2K (2304 x 1296)
- **Video format:** MOV (H.264)
- **Lens:** 170° wide-angle with a high-quality Sony sensor
- **Wi-Fi connectivity:** 2.4 GHz frequency / Transmission power: 0.3 W Protection class: IP65 (waterproof and weather-resistant)
- **Battery capacity:** 1,200 mAh (up to 2 hours of runtime)
- **Storage capacity:** Micro SD cards up to 256 GB

SCOPE OF DELIVERY

Bike Guardian PRO Camera, handlebar mount with adapters, mounting clamp, adhesive mount for helmets and other surfaces, USB charging cable, Allen wrench, installation kit, user manual

Item No.: C1593
