BIKEPLAY PRO

CarPlay for motorcycles with mirroring, 5.5" touchscreen, voice commands and quick release attachment: technology and convenience for the smart motorcyclist.

Multimedia display

BIKEPLAY PRO

BikePlay PRO is CarPlay for motorbikes designed for those seeking the best technology – even on two wheels. Its **5.5" waterproof capacitive touchscreen display, which can be operated even while wearing gloves**, lets you visualise the main information on your smartphone (iOS or Android), delivering total control and zero distractions. Its practical **quick release** system means it can be attached and removed in an instant, making every stop effortless. **Automatic backlighting** ensures optimal visibility even at night, while support for "Siri" and "Google Assistant" voice commands let you manage music, calls and navigation in complete safety. The interface has been optimized to provide you with a simple, intuitive experience in CarPlay without losing Bluetooth functions. Package also includes a **ready-to-use handlebar mount** and a two power supply option, both with quick connection to provide swift and simple removal.

Strengths

- Backlit capacitive display
- Quick release
- Handlebar mount included
- Optional expansion kit with two video cameras and tyre pressure sensors (TPMS) and blind-spot detection (BSD)
- Optional handlebar remote control

BIKEPLAY PRO

Description

BikePlay PRO – The motorbike car play system designed for the smart motorcyclist.

Equipped with a **5.5" waterproof capacitive touchscreen**, which can also be operated when wearing gloves, BikePlay PRO lets you mirror the main information of your smartphone (Android or iOS), reducing distractions while you're riding.

Super-fast attachment. Remove it in an instant.

BikePlay PRO revolutionizes the concept of motorcycle display thanks to its **super-swift quick release system**: whether you're taking a short break or parking up for a few hours, you can remove it in an instant and take it with you, meaning complete security. No tools, no hassle – total freedom.

Optimal visibility in all conditions

The display features enhanced quality and readability, with **automatic backlighting** that adapts to external light levels to ensure maximum clarity – even at night.

Integrated voice commands

"Siri" and "**Google Assistant**" compatible, meaning you can access navigation, calls and music without taking your eyes off the road.

Intuitive, seamless interface

Featuring a redesigned, swift and clear interface, the user experience has been optimised to work even more simply in **CarPlay** mode without losing **Bluetooth** functionality.

Universal, effortless mounting

The package includes a ready-to-use **complete handlebar mount**, which requires no adapters. Also compatible with **RAM "B" type ball** mounting systems.

Dual power supply, maximum freedom

BikePlay PRO adapts to meet your every need:

- **USB-A** cable for swift power connection
- Cable for connecting to your **motorbike's** electricity supply

BIKEPLAY PRO connects directly to your smartphone, which then acts as a bridge to interface with any brand of intercom.

BIKEPLAY PRO – EXPANSION KIT

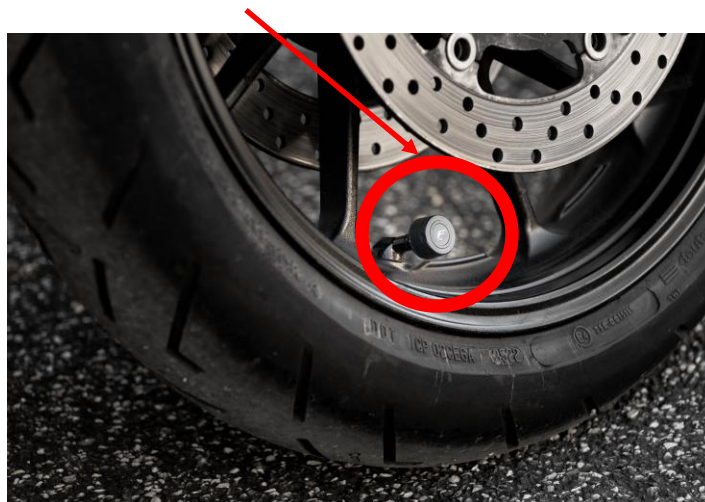

Description

Enhance your BikePlay PRO with the **Expansion Kit**, designed to offer even greater control and safety on every ride. Kit includes:

- **one front and one rear video camera** that allow you to continuously monitor and record everything that happens around your motorbike: videos are saved onto a microSD card (not included) and all functions can be managed directly from the dedicated app. Includes BSD (Blind Spot Detection), a great new feature which uses the rear video camera to monitor blind spots and will alert you when people or vehicles are approaching!

The kit also includes a **Tyre Pressure Monitoring System**, which detects tyre pressure and temperature in real time: if either value fall below the pre-set safety threshold, an on-screen alert is triggered immediately to warn you. Advanced technology – greater peace of mind on the road.

BIKEPLAY PRO – EXPANSION KIT

Kit contains:

- 2 tyre pressure sensors with attachment accessories
- 2 FULL HD 1080p video cameras, multi-connection cable, power cable,
- video camera extension cable,
- installation components

BIKEPLAY PRO REMOTE

Description

In addition to the Expansion Kit, BikePlay PRO also offers a **handlebar remote control**. Positioned next to the handle, this lets you control device main functions without needing to remove your hands from the handlebars. Safely answer or end calls and change screens, activate voice commands with a single touch, switching between CarPlay and dashcam mode without needing to disconnect your phone. An accessory designed to offer you maximum convenience and enhanced safety – even when riding at speed.
