As a true all-rounder, the compact DR 112 outdoor radio not only provides listeners with the latest information and music (reception via FM / DAB+ / streaming) but is also a torch, reading light, thermometer and power bank - and all this can be used without an external power supply! Because as a solar and crank radio, the DR 112 is independent of external power sources and is therefore perfect for outdoor activities. Back at home or in any car, the DR 112 can be conveniently charged via USB-C connection.

Technical details:
