

ALBRECHT DUO USB SOCKET

With the **Duo USB socket**, you'll have power for your electronics on every ride. The socket connects directly to the motorcycle battery; the battery connection cable is included. Thanks to its **sturdy mount**, it can be securely attached to the handlebars or, alternatively, permanently installed on the motorcycle.

You can easily charge your devices using the **two USB ports** and your existing USB cables. You no longer need a separate car charger for each device. This is especially convenient for Midland BT intercoms, Midland XTC action cameras, navigation devices, and smartphones.

New: The built-in **discharge protection** prevents the motorcycle battery from draining unnoticed, ensuring that your bike will start reliably even after a long period of inactivity.

Item No.: 73700

KEY FEATURES

Input voltage

12 - 18 V

2 charging ports

2 × USB-A

Discharge protection

protects the motorcycle battery

Water-resistant to IPX6

ready for any weather
