ENERPUMP MINI

Pocket air compressor for inflating motorcycle and bicycle tires with tire repair kit. Compact, powerful, indispensable.

Compressor

ENERPUMP MINI

Compact. Powerful. Always with you.

The portable air compressor is your number one ally for every trip, short or long. Designed for those who don't want surprises along the way, it combines high performance and maximum practicality in a compact and easy-to-carry design – perfect to keep in a backpack or under the saddle.

The **1000mAh battery** offers you surprising autonomy: forget about cables, inflate anywhere and in total freedom. With a power of up to 100 PSI, it can reinflate motorcycle, car, bicycle and inflatable tires in less than a minute.

In addition, it is the only one on the market that includes a motorcycle **tire repair kit**, designed to solve sudden punctures in a few simple steps and get you back on the road without stress.

Reliable in every situation, indispensable in an emergency, this compressor is a real must-have for those who love independence and safety on every route.

No unexpected events. Just freedom.

Strengths

- Pocket size
- Very light
- Tire repair kit included
- Fast inflation
- Battery life

Compressor

ENERPUMP MINI

Description

Multifunctional solution for mobility and emergency interventions

The portable compressor **ENERPUMP** MINI is a compact and highly versatile device, designed to offer a quick and reliable response to inflation needs while travelling. An essential accessory for users looking for convenience, performance and autonomy in a single product.

Maximum portability

Compact and lightweight design, easily transportable in the car, in a bag or under the saddle. It takes up minimal space, ideal for use on the move or for inclusion in emergency kits.

Accessory Included: Motorcycle tire repair kit

Included in the package, a compact and effective repair kit, designed to quickly intervene in the event of punctures during motorcycle travel. An added value that makes the product unique on the market and reliable for every emergency situation.

High performance

Enerpump mini reaches a maximum pressure of **100 PSI**, enough to inflate motorcycle and bicycle tires in less than a minute. An efficient solution for rapid interventions, also ideal in emergency situations.

LCD Display with Intelligent control

Equipped with **a digital LCD screen**, it allows real-time reading of the pressure. The user can set the desired value: the compressor stops automatically when the threshold is reached. The system stores the preset values for even faster and more intuitive use.

Extended autonomy

Built-in **1000mAh** battery, capable of maintaining standby up to **6 months** with a single charge. No need for cables during use, for maximum operational flexibility.

Robust structure

Body made of **high-resistance PVC**, designed to ensure long life even in demanding conditions of use.
