COMPLIANCE

Device in compliance with the RED 2014/53/EU regulation

Born from the experience of the glorious MIDLAND G7, the G7 PRO walkie talkie introduces, as anticipated by its name, a series of important innovations that make this free-to-use radio the best ally for outdoor enthusiasts.

First of all, a modern design, clean but soft in the lines, makes it an object not only technically above the standards but also of great aesthetic impact, thanks to the complicity of a display 30% larger than the previous one that allows you immediate data reading.

And the many hours of use? Let's start by saying that the problem is reduced to a minimum, thanks to 18 hours autonomy.

In addition to this, however, we are fielding another novelty: the new case can accommodate not only NiMH, alkaline and rechargeable batteries, but even 1200 mAh lithium batteries (optional) which will make the product lighter by 20%!

Moving on to the actual technical characteristics, the G7 PRO gives us other advantages in terms of functionality, performance and versatility. Let's start by saying that the double PTT button allows you to choose whether to use a high or low output power in order to optimize battery life and performance.

We then move on to the "Side Tone" function thanks to which you can say goodbye to the annoying rustle at the end of each transmission. And finally, the audio quality has also improved in view of our daily goal: to give you the #bestaudioever, which is the best audio performance ever.

The picture is really complete: aesthetics, functionality, resistance, battery life, all concentrated in the radio that will make you discover the fantastic world of communication without constraints.

PACKAGE CONTENTS

PMR446 / LPD 433 Mhz radio
