

MIDLAND

M-88

The Midland M-88 CB radio is the fourth model in the new Midland M-Series, featuring a fresh, high-tech design and a compact form factor. It has a large color display on the front. The M-88 complies with all European country standards and can be flexibly powered by either 12V or 24V. The DS (Digital Squelch) function ensures clear reception at all times without disruptive background noise. The built-in VOX hands-free function allows for communication inside the vehicle without having to pick up the microphone. The radio immediately detects when the driver is speaking and automatically initiates transmission. Since the sensitivity and delay of the VOX function are adjustable in several steps, the device can be used hands-free without hesitation while driving.

KEY FEATURES

VOX Hands-Free Function

Starts transmission automatically when you speak, ensuring safe communication in the vehicle.

Europe-wide use & 12V/24V

It complies with all European national standards and can be flexibly operated at 12V or 24V.

A wide range of installation options

They allow for flexible installation in a DIN rail or using a suction cup mount on the windshield, with an extremely shallow installation depth of just 57 mm.

TFT display

features a large, easy-to-read color display with a high-tech design.
