

ALBRECHT MULTICOM 2

Albrecht Multicom 2 radios offer wireless full-duplex communication (simultaneous listening and speaking) for up to 5 people while up to a further 94 participants can listen in.

The versatile and robust devices are suitable for a wide range of applications, for example at sporting events (referees), concerts, conferences, tourist tours, in the service sector, on construction sites, in industrial plants and many other areas where fast and reliable communication is required.

The way it works is very simple: switch on the device, put on the headset and communicate without having to press any buttons, leaving your hands free for other activities.
