STREET GUARDIAN+

C1284

Charming design and **advanced features** are the strong points of the new MIDLAND car camcorder.

STREET GUARDIAN+ has been designed to be the most precious help during a car trip.

It **automatically records whatever happens while you are driving**, it is like having a witness always seating next to you.

Very useful indeed in case of accidents!

STREET GUARDIAN+ has a **FULL HD 1080p** resolution and thanks to the **170° wide angle**, it records everything that happens in front of you as

a third eye on the street; moreover the image stabilizer ensures excellent movies in order to review your video with top quality.

It can be **easily installed on the windshield** of your car thanks to the suction cup supplied in the box and its **compact size does not affect** your driving and the view.

Thanks to the 2 inches display, you can see everything live, watch the recorded videos and easily browse through the settings.

STREET GUARDIAN + has an inbuilt **MINI USB socket** which allows you to recharge the battery, to upgrade the firmware when connected to your computer and to download videos on your laptop.

Works with micro **SD Card** (optional) up to **32Gb**.

STREET GUARDIAN+ has many features:

- **‘Black Box’ feature** : you can automatically save and store the videos in case of accident.
- **‘Motion detection’ feature**: the camera starts recording when something is moving in front of it: don't worry if you are temporarily away from your car, STREET GUARDIAN+ will still be there for you.
- **Monitor parking**: while your car is parked, if an impact or

vandalism incident is detected by the camera, it will automatically turn on and start recording.

COMPLYING TO CE
