

PB42 Lithium

Li-ion battery pack compatible with Alan 42 DS.

- The **2800mAh** capacity provides twice the cycle life and higher capacity than rechargeable AA batteries (1800mAh).
- The **USB C** port makes the power supply system efficient and universal: with the USB C/USB C cable you have a full charge in up to two hours (ten times faster than AA batteries) wherever you want, without the need for a wall power supply.
- The **LEDs** make it easier to understand the progress of the charge and indicate its completion.
