- Weight: 75g
- Dimensions: 48x29x90 mm

Code: C1459.02

- COMPLIANCE

Device in compliance with the RED 2014/53/EU regulation

Midland colours the first radio of the new XT PRO line.

From a social survey among our most loyal fans, the 3 winning colours were: GREEN, ORANGE and FUCHSIA. And here's the production of the first product released right from the network.

XT10 PRO maintains its performance with a wider frequency band (PMR446:446.00625 – 446.19375MHz) and is now water and dew repellent (splash proof)

XT10 PRO confirms communication over distances up to 4 km in optimal conditions, the ease of use that distinguishes the entire XT line and all the features already present.

WALKIE TALKIES are instruments within everyone's reach, especially suitable for family fun. Simple and light, as well as very practical, they can increase the level of safety while carrying out an outdoor activity.

THE XT PRO LINE HAS BEEN AWARDED IN THE PRODUCT DESIGN CATEGORY

red**dot** winner 2022

The **RedDot Award**, one of the most prestigious design awards worldwide, saw us among the winners of the 2022 edition, in the section: Product Design.

The judgement, entrusted to a pool of experts gathered in a panel, came after the analysis of over 6,500 products during the year, coming from many companies and sectors.

From gardening to competitive sports, from automotive to the planning of houses and kits, each application is analysed with precision and attention.

What distinguishes the award - in addition to its long tradition - is the complementarity between design and quality: the tests, in fact, are focused on the overall evaluation of the product, combining aesthetic as well as performance pluses.

A result that once again confirms our daily dedication to making communication accessible to all, and which makes us even more proactive in our goals.

XT70 PRO will be officially listed in the Red Dot Design Museum in Essen, Germany.
